

PIP's guide to COVID-19 for early years children

HELLO!

My name is PIP

I'm here to talk to you
about COVID again..

Are you ready?

COVID is a virus
and can sometimes make us
feel poorly. It loves to jump
around people, so we have to be
careful not to get too close to
each other. It is also important
that we keep washing our
hands with soap.

Can you sing the 'happy
birthday' song twice as
you wash your hands?

You may also see grown ups wearing a face covering when they go outside the house. This is to help protect other people from Covid too!

Have you
seen adults
wearing
masks?

If someone
living with you does
catch Covid, staying
safe and warm indoors
is the best thing
for all your
family to do!

But don't worry,
your family will
look after you, and
there'll still be fun
things to do!

How do you
feel about
COVID?

Relaxed

Nervous

Curious

Sad

Worried

Confused

Or something
else?

I
Understand!

Can you draw
a picture and
show me how
you feel?

That's
a great
drawing,
well done!

Sometimes grown-ups get worried or upset about COVID. There are lots of people working hard to make Covid go away.

COVID will soon be gone!

There are new vaccines available which could help us. Do you know what a vaccine is? If not, your grown up can help to explain.

When COVID comes to visit, it can make you feel hot and a bit tired.

Feeling hot

coughing

Out of breath

You might get a cough and feel out of breath. Sometimes you can't taste or smell your food.

Some people feel poorly for quite a long while, but some people don't even know COVID has paid a visit!

Most people get
better after
COVID pays a visit.

Bye
bye!

The grown-ups
who take care
of you will keep
you safe

All you need to do is:

Wash your hands with
soap and water

Try to keep
your distance
from people
you do not
live with

If you do
that, COVID
will be less
likely to come
and visit!

You can
have lots
of fun at
home too!

Reading
stories

Making
music

Singing
songs

Making
things

Playing
games

Remember to
keep talking about
how you feel.

While you enjoy time
at home, lots of
important people
like doctors and
nurses, will look
after poorly people.

Thank you
everyone!

Have you got any questions?
Talk to your grown-ups,
they can help.

Bye Bye
for now

PIP will see you
very soon!
